

SWAYAM VERMA

Bhopal, Madhya Pradesh, India | +91 9589257347 | [Email](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend-focused Software Developer who has built and deployed full-stack applications integrating AI orchestration (Spring AI, MCP) and secure authentication. Proficient in Java, Spring Boot, and REST API design.

EDUCATION

Bachelor of Technology (Computer Science & Engineering)

Technocrats Institute of Technology (Excellence), Bhopal — Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV)

2023 – 2027 | CGPA: 7.98 / 10

TECHNICAL SKILLS

Programming Languages: Java, Solidity

Backend Technologies: Spring Boot, REST APIs

Database: MySQL, SQL

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Problem-Solving

Cloud & Enterprise: SAP ABAP Cloud (basics)

Tools & Platforms: Git, Postman, IntelliJ IDEA, VS Code

PROJECTS

Virtual AI Doctor *Spring Boot, Spring AI, MCP (Model Context Protocol), JWT, Groq AI*

[Live Demo](#) | [GitHub \(Frontend\)](#) | [GitHub \(Backend\)](#)

- Re-architected a healthcare consultation platform's AI layer from a linear, prompt-concatenation design to Spring AI's MCP server/client integration (built on the official MCP Java SDK), enabling agentic, tool-calling LLM orchestration.
- Implemented MCP tools for on-demand patient-profile retrieval and severity flagging, letting the model fetch context and call external APIs only when relevant rather than embedding full patient history in every prompt.
- Persisted multi-turn conversation history using Spring AI's ChatMemory (JDBC-backed, MySQL), and built JWT-secured REST APIs with automated email/PDF alerting for high-severity consultations.

MessMate — Mess/Tiffin Meal Tracking Platform *JavaScript, Firebase (Firestore, Auth), PWA, Netlify*

[Live Demo](#) | [GitHub](#)

- Independently designed, built, and deployed a full-stack, mobile-first PWA that digitizes daily meal tracking for a mess/tiffin business serving 50+ real customers, replacing an error-prone manual notebook system.
- Modeled a real-time Firestore schema with atomic batched transactions to keep per-customer meal balances, payment records, and a public-facing customer view consistent under concurrent updates.
- Enforced role-based data access with custom Firestore Security Rules, exposing a read-only, token-authenticated view for customers while restricting all write access to a single authenticated owner account.
- Engineered offline-first behavior via Firestore persistence and a service worker, and shipped a bilingual (English/Hindi) UI with usage-based billing logic (variable meal plans, carry-forward balances, automated payment reminders).

PROFESSIONAL EXPERIENCE

Backend Developer Intern

March 2026 – June 2026

Zintrix Technologies | Internship

- Built and maintained backend functionalities using Java, Spring Boot, and REST APIs, applying object-oriented design principles to support reliable service performance.

Google Student Ambassador – Gemini AI

August 2025 – Present

Google (via Ping Digital Broadcast Pvt. Ltd.)

- Selected through a competitive, nationwide program to represent Google AI initiatives on campus, reflecting strong communication and merit-based selection.
- Led workshops, awareness sessions, and community engagement programs focused on AI technologies, strengthening public speaking and collaborative teaching skills.
- Facilitated AI adoption and technical learning for students through hands-on demonstrations and knowledge-sharing events, demonstrating a continued passion for learning and technical mentorship.

CERTIFICATIONS

- SAP Certified Back-End Developer – ABAP Cloud
